

PAYMENT FOR ECOSYSTEM SERVICES

1

CARBON STORAGE AND HABITAT CONSERVATION

Conservation and enhancement of many eco-districts in Manitoba

Protection of Canada's lungs, the boreal forest and its shrubs and wetlands home to over 150 bird species and woodland Caribou

By protecting and conserving the boreal forest it helps keep 444 million tonnes of carbon stored in Asatiwispi Aki

Regulating services including flood and water quality protection and nutrient management for soils and vegetation

Water protection supporting Lake Winnipeg and effective hydro power production for Manitobans

Teaching different generations, the value of water and how to protect our waterways

Clean water supply for the community, contributing to good health

2

CLEAN WATERWAYS & WATER REGULATIONS

Opportunity to revitalize traditional language and culture

Ecological knowledge to community members and sustainable solutions inspired by nature

Supporting inventory of Canadian cultural heritage sites

3

EDUCATIONAL, RECREATIONAL AND CULTURAL SERVICES

Through ecosystem services our community can serve as a testimony of how First Nation communities contribute to Canada's low carbon, climate resilient pathway to meet its Paris Agreement commitments, as well as other global commitments, such as the Convention on Biological Diversity. Together, positively contributing to the global good.

4

GLOBAL GOOD
